*In the event a light cannot be repaired on our first visit, we will contact the individual listed above to report the status and estimated repair time. Reporting large quantities of outages at one time may prevent us from providing our typical 72-hour response.

Pole #	Wattage	Pole Location	Problem

Examples: For safety reasons, our crews typically work during daylight hours. Therefore, pole numbers and/or detailed locations are critical for prompt service.

Examples of problem category items: off all night, on during day, cycling on and off, glass broken, etc.

88-12345 '7' (= 70w) 3rd pole East of 32nd St. on Taylor Drive Lights Out

96-L-34567 '20' (=200w) Bob's Auto, 12345 W Main: Northeast corner of parking lot Cycling On and Off
