OVERVIEW

Rate options

We recommend you review the rate options and prices listed in this brochure. Your current rate description is listed on your bill. Compare this rate description to the other rate options described here. While you are the best judge of which rates are right for your situation, we'll be glad to help you compare rate options.

Renewable energy rates

Customers have the option to participate in the Company's Energy for Tomorrow renewable energy program. The program gives customers the option to pay a premium for the Company to obtain generation fueled by renewable resources. Use of renewable energy resources has a positive impact on the environment and reduces the consumption of non-renewable resources.

Time-of-Use rates

Many customers may benefit from our Time-of-Use rate option. With Time-of-Use, you pay a lower rate when the demand for electricity is low (weeknights, weekends and holidays) and a higher rate when demand is high (weekdays on-peak hours).

The Time-of-Use rate has its own on-peak and off-peak periods. All time periods as stated are the prevailing time Monday through Friday, excluding those days designated as the legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The off-peak periods consist of all hours not designated as on-peak.

A Time-of-Use rate is mandatory for residential customers whose annual consumption exceeds 60,000 kWh. However, residential customers mandated to the residential Time-of-Use rate have the option to opt out of that Time-of-Use rate.

Extra meter charges

The Company generally supplies no more than one service drop/lateral to a premise and not more than one meter. The monthly charge for each additional meter will either be an additional facilities charge or an extra meter charge. The determination for such charge will be in accordance with the Company's approved Rules and Regulations, Volume 17, Section 103.1.

Service charges

- All customers are subject to a late payment charge of 1 percent per month on all amounts past due.
- A \$15 service fee is charged for all returned checks, plus additional bank charges that may be incurred.

Time-of-Use rates for farm customers

Time-of-Use Rates are available to farm customers. If both the residential and commercial portions of the farm customer's service are served through one meter, the farm customer may take service under the General Secondary Time-of-Use rate but not the Residential Time-of-Use rate.

RENEWABLE ENERGY RATES

Experimental Renewable Energy Rider (ERER1)

This program is available to customers taking service under rate schedules Rg1, Rg2, Fg1, Cg1, and Cg6 who pay a premium on their usage for the Company to obtain energy from generating sources that are fueled by renewable resources for 25 percent, 50 percent or 100 percent of their usage. In addition to the charges and credits of the rate schedule under which the customer is served, there will be an adder per kWh as follows:

25% participation level	\$.00502 per kWh
50% participation level	\$.01004 per kWh
100% participation level	\$.02007 per kWh

The fuel cost adjustment of the rate schedule under which the customer is served is applicable and will be prorated depending on selected participation level.

Energy Charge (per month, per light fixture)

The Company uses the kWh usage brackets below to determine the appropriate per light fixture monthly charge. To determine the kWh usage bracket for each light fixture, the Company will multiply 103 percent of the rated input wattage of the original light fixture and related accessory equipment by the estimated average monthly burn hours and round to the nearest whole number.

\$1.00 per month, per light fixture.

Adjustment for cost of fuel

To determine the total kWh usage subject to the adjustment for cost of fuel, each month, the Company will add together the maximum kWhs of each light fixture's associated usage bracket. The maximum kWhs for each bracket are shown in the Energy Charge section.
