Natural gas rates for commercial, industrial and farm customers

The natural gas rates listed in this brochure are the rates authorized by the Public Service Commission of Wisconsin (PSCW), effective Jan. 1, 2015, for Wisconsin Electric Power Company doing business as We Energies.

For additional information on the We Energies natural gas service rates or to check your rate options, please contact us.

Energy you can depend on

Rate classes

We Energies offers a variety of natural gas rate classes depending on the type of natural gas service provided and the amount of natural gas you use. Each year, we will review your past twelve months of consumption adjusted for normal weather and determine the appropriate rate class.

Generally speaking, there are two major services: **sales service** and **transportation service**.

Under **sales service**, We Energies provides the entire natural gas supply package including the natural gas itself, interstate movement of the natural gas from the production fields to Wisconsin, and distribution of the natural gas within the We Energies service area.

Customers also have the choice of firm or interruptible Sales Service rates.

Under **transportation service**, We Energies provides distribution of natural gas within the We Energies service territory. The customer arranges for everything else, including the natural gas purchase and delivery to We Energies. While you are the best judge of which services are right for your situation or business needs, we will be glad to help.

Effective sales service rates may increase or decrease each month based on the **Purchased Gas Adjustment (PGA)**. These adjustments are based on the actual cost of natural gas paid by We Energies each month and are shown as a PGA on your monthly bill.

Sales service rates

Customers pay a daily facilities charge and a rate per therm for the natural gas used. Please note that the rate per therm may change each month depending on current natural gas prices. See the PGA on your bill.

Interruptible sales service

Customers are charged a reduced rate in exchange for allowing We Energies to interrupt up to 100 percent of a customer's natural gas use with a one-hour notice. Interruptible sales service is offered with firm distribution capacity. Non-power generation customers may have the option to negotiate for a distribution capacity credit with or without a natural gas supply interruption credit. All customers must have remote meter reading equipment.

Transportation service rates

Customers pay a daily facilities charge and a rate per therm for the natural gas transported. In addition, customers on transportation service are charged a \$2.00 per day administration fee (Included in Facilities Charge below).

All transportation customers are subject to daily balancing rules and are required to have remote meter reading equipment. Customers incur extra charges when imbalances occur. An imbalance is the difference between the amount of natural gas actually used by a transporting customer compared to the amount of natural gas brought into the We Energies distribution system for that transportation customer.

If customers deliver more natural gas than they use, We Energies will purchase it from them. If customers use more natural gas than they had delivered, We Energies will sell them the additional natural gas. Substantial penalties may apply for unauthorized use of natural gas.

Balancing rates

Contact We Energies for the current balancing and cash-out rates, which are applicable to all transportation customers.

Commercial and industrial firm transportation service

Customers contract for one year or more to receive firm delivery of customer-owned natural gas through the We Energies distribution system.
