Spring outdoor safety

Ready to start spring yardwork? For your safety, and to protect power reliability, make sure to look up, look around and know what's below.

- ✓ **Inspect your trees**
 Look for dangling or unhealthy branches and note the distance from power lines. Branches touching or falling on lines could cause power outages, fires or other safety hazards. That risk grows when there is severe weather.
- ✓ **Check for emerald ash borer**
 Ash trees die within three to five years of emerald ash borer (EAB) infestation, creating a risk of branches falling on power lines or property. Consider removing dead or dying trees to eliminate the risk and protect your energy service.
- ✓ **Practice safety first**
 - If your trees need work, make sure safety is always your top priority.
 - Check with We Energies for a forestry inspection if you are unsure the work is clear of power lines.
 - Use a professional arborist for tree trimming and removal.
 - Never let ladders or tools come in contact with power lines.

Wood chips

As a result of our line clearance program, wood chips may be available upon request by calling us at 800-242-9137. Learn more at www.we-energies.com/safety/wood-chips

Go to www.we-energies.com/safety/tree-trimming for examples of planting safely around power lines and equipment.

April is National Safe Digging Month

Call 811 or go to missdig811.org at least three business days before you begin any digging project. This free service marks the location of buried public utilities (electric, cable, natural gas and water) in your yard. It's also the law.

Support renewable energy through Energy for Tomorrow®

Energy for Tomorrow is a renewable energy program for electric customers who want to make a difference in the environment by increasing electricity production from biogas sources. When you enroll at the 25%, 50% or 100% level, we produce or purchase renewable energy to match that percentage of your electricity use. Renewable energy is charged at a higher rate than electricity generated from traditional sources, such as coal and natural gas.

Enroll in Energy for Tomorrow at

www.we-energies.com/environment/energy-for-tomorrow-mi

Energy for Tomorrow premium per month

Based on an average home using 660 kilowatt-hours (kWh) per month. Charges are in addition to the regular electric bill.

25%	\$0.00212/kWh	\$1.40
50%	\$0.00425/kWh	\$2.80
100%	\$0.00849/kWh	\$5.60

Simple steps.
REAL SAVINGS.
