Summer safety

Prepare for storms

We work hard to provide reliable electric service, but severe weather and other events sometimes cause power outages. Be prepared and know what to do if a power outage occurs.

Make a plan

- Pack an emergency kit with food, water, flashlights, batteries and a charged cellphone power bank.
- Notify us if someone in your home relies on power for critical medical needs.
- Make sure we have your correct contact information to reach you during outages or other emergencies.

Report your outage

If you experience a power outage, make sure we know about it. This helps us better identify and coordinate restoration efforts.

Report your outage in our app, on our website at we-energies.com or by calling **800-662-4797**.

Stay away

If you see a downed power line, stay at least 25 feet away and consider it energized. Call us to report it right away.

Use caution near dams

We maintain hydroelectric stations and dams on public waterways in Wisconsin and Michigan's Upper Peninsula. Dams are vital to our total electric supply, but can be dangerous if unsuspecting boaters get too close. Read more at www.we-energies.com/safety/dam.

Teach kids to be safe

Make sure your children know how to use electricity and natural gas safely and wisely.
