

Gift of **Energy**

Give the Gift of Energy by paying a portion of someone's energy bill — a practical and convenient gift for any occasion. Simply complete the form at **we-energies.com** and mail it to us with a check for any amount. You choose whether we mail the certificate to you or the recipient. The amount is credited to the recipient's bill.

No fees apply.

Highlighting our sustainability efforts

WEC Energy Group, parent company of We Energies, released its 2025 Corporate Responsibility Report, which outlines the progress made on major projects and our commitment to the environment and the communities we serve.

Data-driven ways to save

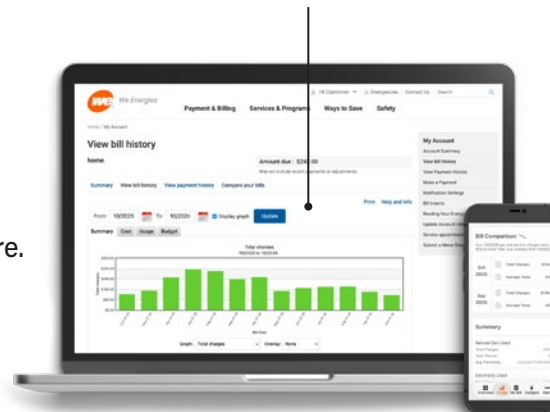

Sign in to our app or My Account to track energy use and manage costs.

Compare bills month-to-month or year-to-year.

See shifts in average temperature.

Monitor changes in cost and use.

App or website

No matter which online option you choose, you'll find all of your bill details and a link to our monthly bill inserts. All these features are available when you create a My Account profile on our website or through our app.

Smart solutions for the holidays

Deck the halls with LEDs: See how much you can save with our holiday lighting calculator at www.we-energies.com/savings/holiday-calculator. Save more by using a timer or smart plug to limit how long the lights stay on.

Turn it down: Adjust your thermostat down when cooking and entertaining. Every 1 degree you lower your thermostat may reduce your energy use by 1%-3%.

Wrap up drafts: Like wrapping a gift, cover drafty windows and seal gaps around doors to keep warm air in and help lower your heating costs this winter.

Skip the oven: Cook as many dishes as possible with your microwave, slow cookers or air fryer to save. They cook food quicker and can use as much as 75% less energy than a conventional oven.

Prepare for winter months

Increased energy bills in November, December and January can be common, mainly due to colder weather and holiday gatherings — which may increase energy used for decorating, cooking and cleaning.

Ways to control energy costs:

- Sign up for Budget Billing to help even out seasonal variations in your bill.
- Check out our energy-saving tips and videos.
- Apply for energy assistance, if eligible.
- Make payment arrangements if bills become past-due.

Save money while renting

Energy-efficient apartment living

You don't have to own your home to improve its energy performance. There are easy things every renter can do to save money.

Simple swaps:

- ENERGY STAR certified LED light bulbs use 90% less energy than traditional bulbs.
- Smart plugs can stop your appliances from drawing power when not in use.
- Water-efficient fixtures for the shower and faucets can help you reduce hot water use.
