					Seasonal load and speed restrictions are placed each year on County roads in order to help minimize the impact of heavy truck traffic during the annual spring freeze/thaw cycle. Due to road classification and the deteriorating condition of many roads in the County, these restrictions are critical in order to prolong the life of these roads as much as possible. On restricted roads, axle loadings are reduced by 35 percent and the speed limit is reduced to 35 mph, unless posted lower, for every vehicle with a gross weight of 10,000 pounds or more. Certain roads that are designated "All Season" routes and considered to be in satisfactory condition can be utilized for up to normal legal loading (no overweight loads) during seasonal restrictions. Dickinson County has over 25 such roads listed as "All-Season" routes. Please visit our website at www.dickinsoncra.com to view the list and the latest updates. Also			Starting Sunday, March 7, 2021 at 10:00am (CST), road restrictions will be placed on county roads SOUTH OF M69.
