

Site Plan - Existing Building

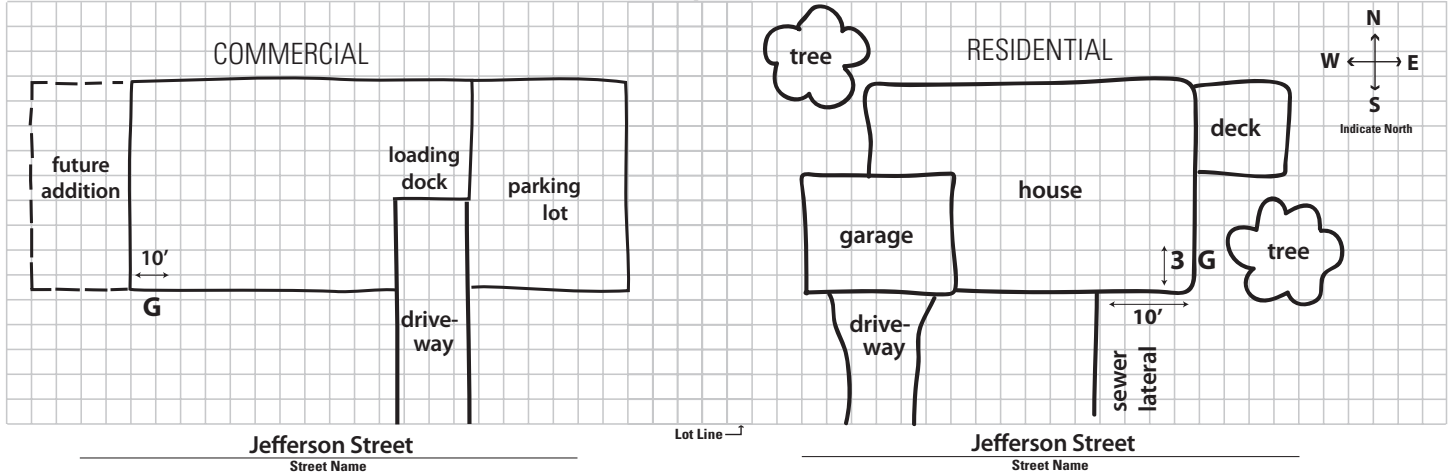

Use this site plan to sketch your building site details (including location of well, septic or sewer lateral, private electric, etc.). Please note any planned decks, pools, driveways, retaining walls, etc., so our facilities won't be in your way in the future.

Visit www.we-energies.com/newservice to review:

- Meter location
- Marking private underground facilities
- Service installation path requirements

Examples

Building and meter locations:

Natural gas meter location: 10' ft. E of the SW corner
(mark with a "G" on the Site Plan)

Building and meter locations:

Natural gas meter location: 3' ft. N of the SE corner
(mark with a "G" on the Site Plan)

Please sketch building site in space below and mark all pertinent site and meter information. (See examples above.)

Building and meter locations:

Natural gas meter location: _____ ft. _____ of the _____ corner (mark with a "G" on the *Site Plan*)

Note: Ask your heating contractor to locate your natural gas meter as close as possible to We Energies facilities. Natural gas *usually* comes in from the street. Locating your meter elsewhere can result in additional charges.
