\*= Estimated reading x= Cancelled reading (not included in totals) \$/Day= energy charges divided by days in the billing cycle

If you are a **Budget Billing** customer, the charts above show your actual use and electric and natural gas charges, not your monthly budget amount.

This comparison is designed for customers who have one electric and one gas meter only. We apologize that if you have a different grouping of meters, the information displayed will not be accurate.

### Why do natural gas prices fluctuate?

We buy natural gas at the lowest possible rates throughout the year to minimize the impact on our customers. The cost of natural gas changes every month based on supply and demand. We are committed to providing you with safe and reliable service, making sure we always have enough natural gas supply to meet the needs of our customers while keeping prices as low as possible.
